

Designed for coastal properties, lifestyle blocks, and anyone needing secure storage with a practical yet stylish finish, our custom boat sheds and garages are built to suit your needs. Whether you need space for boats, vehicles, trailers, recreational gear, or workshop areas, we can design a solution that maximises functionality while complementing your property.

From coastal-inspired designs through to modern architectural finishes, every shed can be customised with different cladding options, colours, doors, windows, and internal layouts.

At Ultra Built Sheds, all sheds can be custom designed and built to your requirements, or supplied as a custom-designed shed kitset for those wanting to complete the build themselves. Available in timber or steel construction, we can create solutions for residential, lifestyle, and commercial applications.

Floor Area: 78m²

6.5.0m **12.0m**
